Summary

3rd year EE student | Python & Flask Developer | AWS EC2 | Seeking Web Development Internship

Education

Degree/Certificate	Institute/Board	CGPA /Percentage	Year
B-tech major	CSMSS	7.5 (current)	2025 present
Senior secondary	Maharashtra B	74.67	2023
Secondary	Maharashtra B	87.20	2021

Projects

• Smart Home Automation System using ESP32 and Arduino (Academic / IoT Project) 2023-2024

- Built an IoT-based smart home automation system using ESP32, Arduino, sensors, and relay modules.
- Implemented automated control of electrical appliances based on sensor input and predefined logic.
- Integrated hardware and software components to demonstrate real-time control and monitoring.
- Focused on practical electronics, embedded programming, and system-level debugging.

• Flask Skills Tracker – AWS Deployment — 2025

- Developed Flask-based application to manage skill data using Python
- Deployed on AWS EC2 using virtual environment & Gunicorn
- Configured Linux networking and resolved real-world deployment issues
- Managed background processes and ensured application stability
- GitHub: github.com/krishoo2005/flask-aws-elastic-beanstalk-app

• Professional Full-Stack Portfolio Website — 2026

- Built responsive portfolio using HTML, CSS, JS
- Integrated contact form with basic backend

• Web-Based Event Management System — 2026

- Built event booking system with login and dashboard
- Used JavaScript DOM for frontend interactions

• Flask Multi-Page Web Application — 2026

- Built multi-page Flask app with routing and Jinja2 template inheritance
- Implemented base.html with navbar, footer and multiple pages
- Created contact form with Flask form handling
- Deployed locally using Flask dev server

Achievements

- KPIT Sparkle 2025
 - Cleared 2 Competitive Levels of the national-level innovation challenge
- IGNITE Project Expo 2025
 - Served as Leading Event Coordinator
 - Managed technical presentations and student project evaluations
- Participant – UIDAI Data Hackathon 2026 (Government of India).

Technical Skills

Programming Languages: Python (Core), JavaScript

Frontend: HTML, CSS

Cloud Platforms: AWS (EC2, Elastic Beanstalk)

Operating Systems: Linux (Ubuntu)

Version Control: Git, GitHub

Tools & Design: AutoCAD Electrical

Web & Backend: Flask, Basic Node.js, REST API (Basics)

Databases: SQLite, JSON, PostgreSQL (basic)

Server & Deployment: Gunicorn, Basic Nginx

Embedded Systems: Arduino, ESP32
